YESSSSSS I'VE JUST DISCOVERED WordPress

MAKES MY LIFE EASIER

SO BIG COMMUNITY
TO COUNT ON

I CAN FIND A PLUGIN AND
JOB DONE JUST LIKE THAT!

SO MANY FREE & PREMIUM
THEMES, I LOVE THEM!

GOOGLE IS MY FRIEND I CAN
I CAN SEARCH AND FIND AND
DOWNLOAD ANYTHING!

YESSSSSS I'VE JUST DISCOVERED WordPress

By the time that i wrote this slider:

WordPress 4.4 **has been downloaded 39,805,147 times.....** { <https://wordpress.org/download/counter/> }

WordPress currently **runs more than 74,6 million websites...** {CNN, TechCrunch, Forbes}

Almost **30,000 people make money using WordPress every day.**

More than **20,000 WordPress plugins are available**

Estimated Number of **WordPress Plugins Downloads? 300,000,000 times!!**

Ohh we got a problem....

101110001010101001010
010101010100101010101

Το WordPress λόγω της απλότητας της χρήσης του, άλλα και την τεράστια δημοτικότητα που έχει αποκτήσκει, αποτελεί αυτή τη στιγμή έναν απο τους μεγαλύτερους στόχους για την διάδοση των πιο κύριων μορφών εξαπάτησης και κυβερνοεγκλημάτων

Το κύριο Πρόβλημα

Το ανησυχητικό κομμάτι της υπόθεσης είναι, ότι οι κακόβουλοι χρήστες εκμεταλλεύονται κυρίως την **ανθρώπινη άγνοια**.

#StayUpdated

The Perfect Security Password COMBO

WordPress CORE....

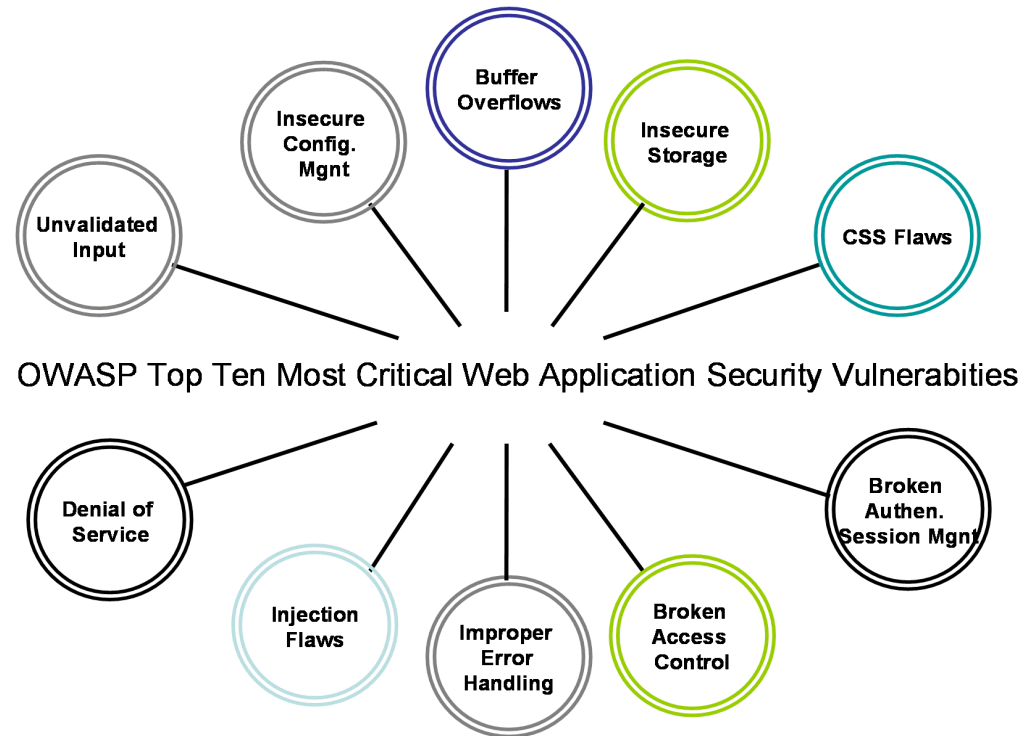

The WordPress core has three different types of updates:

- Core development updates, known as the "bleeding edge"
- Minor core updates, such as maintenance and security releases
- Major core release updates

-OWASP Top 10 Vulnerabilities ==>

The Open Web Application Security Project (OWASP) is a 501(c)(3) worldwide not-for-profit charitable organization focused on improving the security of **software**. Our mission is to make software security visible, so that individuals and organizations worldwide can make informed decisions about true software security risks.

Introducing VIRUS

101110001010101001010
010101010100101010101

“A virus is a program that reproduces its own code by attaching itself to other executable files in such a way that the virus code is executed when the infected executable file is executed.”

“Ένας ιός είναι ένα πρόγραμμα που αναπαράγει τον κώδικά του με την ένωση του με άλλα εκτελέσιμα αρχεία με τέτοιο τρόπο ώστε ο κώδικας του ιού να εκτελείται όταν εκτελείται το μολυσμένο εκτελέσιμο αρχείο.”

There are a large number of virus types for all Machines.
